

CD1624

V_{CC}/GND to all blocks

Microarchitecture Diagram:

AFE Blocks:

- diff_amp
- res_divider
- ntc_bias
- hb_timer

Comparator:

- many modules, same as block diagram

FSM:

- fault_fsm, state register, next-state logic, output logic (Mealy/Moore?)

I2C block:

- Has regmap comparing threshold to comparator
- L3 So stand in FSM, I2C threshold

Output Drivers:

- output-stage module, takes FSM, drives open drain HEALTH, EN_OUT

on silicon:
